The American <u>cult of the individual</u> denies not just community but the very idea of society. No one owes anything to anyone. All must be prepared to fight for everything: education, shelter, food, medical care. What every prosperous and successful democracy deems to be fundamental rights – universal health care, equal access to quality public education, a social safety net for the weak, elderly, and infirmed – America dismisses as socialist indulgences, as if so many signs of weakness.

Wade Davis – "The Unraveling of America" – *Rolling Stone*
